ASX ANNOUNCEMENT

The Company wishes to advise that it has recovered a number of rough diamonds from operations at the Merlin diamond mine including a 35.26 carat brown diamond (which is the fifth largest diamond discovered in Australia), a 14.6 carat brown diamond as well as a number of smaller white diamonds.

The Merlin diamond mine is known for its high quality large super white diamonds and Australia's largest diamond ever found and the recoveries of the diamonds noted above continues to demonstrate the potential for large diamonds.

Rough Diamonds before cleaning and polishing

Merlin is known for its high quality white diamonds, and Australia's largest diamond. Note that clarity and whiteness of diamonds are not visible on this photo. Professional photos will be released in the future. Photo released due to the relevance of the discovery of the large diamond.
